

**STATE OF MAINE**

**DEPARTMENT OF ENVIRONMENTAL PROTECTION**

**UNCONTROLLED HAZARDOUS SUBSTANCE SITES PROGRAM**

**LIST OF SITES REPORTED TO THE  
STATE OF MAINE  
UNCONTROLLED SITES  
PROGRAM**

**UPDATED September 2002**

**EXPLANATION, ACRONYMS AND DEFINITIONS  
(prepared by the Uncontrolled Sites Program)**

**Disclaimer:** Although an effort was made to provide correct, up-to-date information for all sites, the DEP does not guarantee the accuracy of this List. It is to be considered guidance only. Users are advised to review case files where accuracy is critical.

**Note:** This List refers to USP interests only; it is not intended to be inclusive of all state programs. Other programs, such as Solid Waste, Underground Storage Tanks (USTs), Oil Spills, Federal Facilities or RCRA may have an on-going interest in the site.

**Clarification:** The List contains sites which were reported to the Uncontrolled Sites Program. Inclusion on the List does not mean that a particular site is an uncontrolled hazardous substance site. In the past, many sites were added as they were reported and prior to any investigation. It is now the intent of the Uncontrolled Sites Program to add sites only after it has been determined that they contain hazardous substances which may pose a threat.

This is the September 2002 Maine Sites List Update (List). The information is current to September 26, 2002 and contains entries for 449 sites. Of these, the Maine Department of Environmental Protection's Uncontrolled Hazardous Substance Site Program (USP) is actively involved with 136. Of the remaining 314, 235 are designated inactive and 78 are resolved. As of September 15, 2002, 30 Sites have been removed from the List (see below). The USP intends to routinely review sites as part of List Updating process. Site names where September 2002 changes were made are **bolded**. Dates when significant changes to the List were made are presented in the “Listing Change” column. The column USP Priority describes the interest that the USP has in the site. "Active" means that the USP has an on-going interest in the site, either further on site work is required or tasks (such as cost recovery) must be completed. "Inactive" means that the USP does not have an interest in the site. There are several reasons a site can be designated "inactive", including: the site has been investigated and no real or potential threat was found or after investigation the site was referred to another program. An "inactive" site may become active if new information comes to light indicating a problem, or if, during a file review, reason is uncovered to require further investigation. "Resolved" means that the USP has performed a final review of the site's case history and signed off on the site. This is not meant to be confusing, but as an attempt to clarify the site's standing and to provide additional comfort. If a site is inactive, the USP doesn't consider the site a threat, but has not completed a case review. This means that, technically, the USP is not finished with the site. If a site is "resolved", USP is finished with it unless new information, indicating a problem, comes to light.

**New for January 2000 List and subsequent lists:** Sites are removed from the List once it is determined that they are not “worthy of listing”. This term is used as there are a number of reasons to remove a site from the List, including: no file exists, the site was reported as an oil spill, there is no evidence of a hazardous substance release or based on an investigation the site is referred to another program unrelated to hazardous substance or hazardous waste. Sites are removed on a case by case basis. The USP intends this to be an on-going process, as time and resources allow.

Contacts for specific program information:

<i>State Uncontrolled Sites Program (and List)</i>	Hank Aho	207-287-4850
<i>State Contact for NPL, DOD and FUD Sites</i>	Denise Messier	207-287 4851
<i>State VRAP contact</i>	Nick Hodgkins	207-287-4854
<i>EPA, Region 1 contact for CERCLIS</i>	Mathew Audet	617-918-1449
<i>Division of Remediation, Director</i>	Mark Hyland	207-287-7673
<i>Maine DEP, Bureau of Remediation and Waste Management</i>		207-287-2651

Copies of this List may be obtained by calling 207-287-7843.

This list is also available on the DEP (Remediation) web site:

<http://www.state.me.us/dep/rwm/rem/lists.htm>

In the interest of conserving space, the List has been created using code words and acronyms to present site information. Definitions are provided in the following:

> Means "referred to"

**Active:** Some level of USP activity is associated with the site.

**ANG** - Air National Guard

**Archive** - This designation is applied to sites the DEP has requested EPA Region 1 remove from the active CERCLIS list and place on the inactive or "archived" list. These sites are either regulated under a State authority, have been successfully remediated, or do not pose a significant risk to human health and the environment. Although they remain part of EPA's CERCLIS database, the EPA will not investigate them further unless new information comes to light. Note: The State may consider them active, even though EPA is finished with them

**ARNG** - Army National Guard

**BLWQ** - Maine DEP's Bureau of Land & Water Quality

**BRWM** - Maine DEP's Bureau of Remediation and Waste Management

**BRWM L&E** - Referred to BRWM's Division of Licensing and Enforcement (now the Division of Oil and Hazardous Facilities Regulation).

**CERCLIS** - Comprehensive Environmental Response Compensation and Liability Information System. EPA's list of potential Superfund sites. The status of the Site on CERCLIS is not provided in this list. CERCLIS is updated routinely, list users wanting specific information about a particular site listed on CERCLIS should check with EPA Region 1

**Complete** - All activities to a defined point have been completed. For example, SC Complete or Removal Complete. May also mean that VRAP activities are complete.

**DEP** - The Maine Department of Environmental Protection

**DFSP** - Defense Fuel Support Point

**DLA** - Defense Logistics Agency

**DOD** - Department of Defense (active or closed installation)

**EPA** - United State Environmental Protection Agency

**FED** - Federal activity at the site; usually Department of Defense or EPA

**FS** - Feasibility Study

**FUD** - Formerly Utilized Defense Site.

**G/W** – Groundwater

**HRS** – Hazard Ranking Score – process used to determine whether a site is eligible for consideration on the National Priorities List (NPL).

**Inactive** - This means that no further work is anticipated, however, the site has not had a formal final review and sign off. See Resolved and Active.

**LUR** - Land Use Restrictions are in place.

**MOM** - Management of Migration (generally plume control)

**Mon.** - Monitoring activities are on-going. The includes such things as collection and analyses of water or air samples

**NA** - Not applicable for federal review. Not considered for listing on CERCLIS.

**NFA** - No Further Action. This is a State determination meaning that the State does not anticipate additional work at the site. See Resolved and Inactive.

**NFRAP** - No Further Remedial Action Planned. This is an EPA determination, not valid for State. The listed date is the date EPA's last activity was finished. This designation means that EPA has determined that the Site does not belong on CERCLIS because it will not score high enough to be placed on the NPL, or it is being handled by another program (i.e., RCRA). This does not necessarily mean that there will not be any state action.

**NOID** – Federal term for “Notice Of Intent to De-list”. Refers to removing a site from the Superfund List.

**NPL** - Federal National Priorities List or Superfund List

**O&M**: Operation and Maintenance activities are on-going. These include such things as filter maintenance and mowing grass on a landfill cover.

**Oversight** - Protecting the state's interest by providing guidance and assistance and actively participating in remedial activities/decisions conducted by another (usually federal) governmental agency.

**RA** - Remedial Action

**RD** - Remedial Design

**Removal** - Referred to BRWM's Division of Response Services or removal action taken.

**Resolved** - A formal final review and sign off has been performed.

**RFI** - Requires further investigation.

**RI** - Remedial Investigation

**SC** - Source Control. Refers to actions taken that address the source, as opposed to a contaminated groundwater plume.

**Solid Waste** - Referred to BRWM's Division of Solid Waste.

**State** - State activity at the site.

**USP** - Uncontrolled Sites Program or State Uncontrolled Hazardous Substance Sites Program; for the purpose of this list this includes state sites and state involvement in DOD sites, FUD sites and NPL sites.

**VRAP** - Voluntary Remedial Action Program (or Plan)
